Memberships

API definition

CustomerMemberships_GetList

Gets a list of customer memberships

Request

Production Environment

GET https://api.servicetitan.io/memberships/v2/tenant/{tenant}/memberships?ids|customerIds|status|active|billingFrequency|lastCreatedBefore|lastCreatedAfter|lastModifiedBefore|lastModifiedAfter|page|pageSize|includeTotal|sort

Integration Environment

GET https://api-integration.servicetitan.io/memberships/v2/tenant/{tenant}/memberships?ids|customerIds|status|active|billingFrequency|lastCreatedBefore|lastCreatedAfter|lastModifiedBefore|lastModifiedAfter|page|pageSize|includeTotal|sort

Request parameters

Name	In	Required	Type	Description
tenant	template	true	integer	Tenant ID
ids	query	false	string	Perform lookup by multiple IDs (maximum 50)
customerIds	query	false	string	Filters by customer IDs
status	query	false	string	Filters by membership status. Values: Active, Suspended, Expired, Canceled, Deleted
duration	query	false	integer	Filters by membership duration (in months) use null for ongoing memberships
billingFrequency	query	false	string	Filters by membership billing frequency Values: OneTime, Monthly, EveryOtherMonth, Quarterly, Biannual, Annual
active	query	false	string	What kind of terms should be returned (only active terms, only inactive terms, both) Values: True, False
createdBefore	query	false	string	Return terms created before certain datetime (in UTC)
createdAfter	query	false	string	Return terms created on or after certain datetime (in UTC)
modifiedBefore	query	false	string	Return terms modified before certain datetime (in UTC)
modifiedAfter	query	false	string	Return terms modified on or after certain datetime (in UTC)
page	query	false	integer	The logical number of page to return, starting from 1
pageSize	query	false	integer	How many records to return (50 by default)
includeTotal	query	false	boolean	Whether total count should be returned

Response: 200 OK

The request has succeeded
