## Q Crawling & Indexing

4 41

0

### Description

Your website's pages must first be properly crawled and indexed to appear in search engine results. This section contains checks for main factors that can affect search engine crawlers' scanning and indexing of your site.

ISSUES	PAGES	NEW	FIXED
4XX HTTP Status Codes	2	0	0
<a href="https://www.plumbersthatcare.com/commercial/+15123689159">https://www.plumbersthatcare.com/commercial/+15123689159</a> <a href="https://www.plumbersthatcare.com/blog/+15123689159">https://www.plumbersthatcare.com/blog/+15123689159</a>			
<b>Issue description</b> <i>4XX HTTP status codes indicate that the requested page or resource cannot be accessed. 4XX URLs provide a poor user experience for the site's visitors because they cannot access the page or file via the link they clicked on. Moreover, internal links to 4XX URLs drain your crawl budget. Pages of your website that changed their response code to 4XX will be removed from search engine indexes.</i>	<b>How to fix</b> <i>Review the list of 4XX URLs and analyze every internal page that's linked to a 4XX URL. Remove such broken links or replace them with appropriate links to live and accessible pages. Moreover, you can set up 301 redirects when moving or deleting the site's pages to avoid having 4XX errors. The HTTP response code 429 (Too Many Requests) may indicate that the crawl rate specified under the crawl settings for your project is too high for the web server to handle. Decrease it via the settings (Limits and restrictions) and rescan the project.</i>		
Canonical URL with a 3XX Status Code	2  39	0	39
<a href="https://www.plumbersthatcare.com/+15123689159">https://www.plumbersthatcare.com/+15123689159</a> <a href="https://www.plumbersthatcare.com/+18304603565">https://www.plumbersthatcare.com/+18304603565</a>			
<b>Issue description</b> <i>A web page specified as canonical, returns a 3XX response code.</i>	<b>How to fix</b> <i>Analyze the list of canonical URL pages that point out to redirected pages. Replace canonical URLs containing redirects with 200 OK pages that you want to get indexed and be displayed in the SERPs.</i>		
Blocked by noindex	1	0	0
<a href="https://www.plumbersthatcare.com/refund_returns">https://www.plumbersthatcare.com/refund_returns</a>			
<b>Issue description</b> <i>The noindex directive in the &lt;head&gt; section of the page's HTML code prevents search engines from displaying the page in the search results. If the page uses the noindex directive, search engines will not rank the page, even if other websites link out to it.</i>	<b>How to fix</b> <i>Only use this directive on pages that you don't want to appear in the search results. Make sure these pages are not blocked by the robots.txt file. Otherwise, search engine bots will not be able to see the noindex directive, and if other websites link out to these pages, they can appear in the search results.</i>		
Blocked by nofollow	1	0	0
<a href="https://www.plumbersthatcare.com/refund_returns">https://www.plumbersthatcare.com/refund_returns</a>			
<b>Issue description</b>	<b>How to fix</b>		

ISSUES	PAGES	NEW	FIXED
<i>The nofollow attribute in the &lt;head&gt; section of the page's HTML code prevents search engines from clicking on all links on this page.</i>			
<i>Use the nofollow attribute only if you do not want search engine bots to follow all the links on a specific web page. Make sure that pages that use the nofollow attribute are not blocked by the robots.txt file. Otherwise, search engine bots will not be able to see the nofollow attribute.</i>			

## Redirects

 0 19  4

### Description

Misconfigured redirects can lead to incorrect locations. This can confuse users, ruin their experience, increase the number of HTTP requests to your website, and result in a traffic drop and crawling budget decline. The checks in this section help you maintain control over your redirects and pinpoint room for improvement related to them.

ISSUES	PAGES	NEW	FIXED
 3XX HTTP status code	19  86	2	88

<a href="https://www.plumbersthatcare.com/%2B18304603565">https://www.plumbersthatcare.com/%2B18304603565</a>			

ISSUES	PAGES	NEW	FIXED
<b>Issue description</b> <i>The pages indicated in the report return a 3XX response code, meaning that a redirect is set up from such pages. The 3XX response code in itself is not a problem, but each redirect puts an additional load on the server, so it's better to remove unnecessary internal redirects.</i>	<b>How to fix</b> <i>Make sure that the number of 3XX pages on your website does not exceed 5% of the total number of pages. If their number exceeds 10%, then you have a critical problem, and you should immediately remove some of the redirects.</i>		

## Sitemap

1  5 0

### Description

A sitemap is a file that contains a list of all the URLs on a website that crawlers should be aware of. It must be free of irrelevant or invalid URLs to prevent it from hurting your crawl budget. The checks in this section help ensure your sitemap remains in place and error-free.

ISSUES	PAGES	NEW	FIXED
 Noindex pages in XML sitemap	1 	1	0
<a href="https://www.plumbersthatcare.com/refund_returns">https://www.plumbersthatcare.com/refund_returns</a>			
<b>Issue description</b> <i>Pages with the noindex meta tag were found in the XML sitemap. This is confusing to search engines because sitemaps must list pages that need to be crawled and indexed.</i>	<b>How to fix</b> <i>Depending on your goals, you need to remove pages with the noindex meta tag from your XML sitemap or remove the noindex tag from these pages.</i>		

## Meta Tags

17  0

### Description

Meta tags reveal important information to search engines about your page, including its relevance to the user's search query. The checks in this section help ensure that your meta tags are in place. They also highlight potential areas for improvement.

<b>Issue description</b> <i>Duplicate description meta tags were found on your website's pages. As a result, you may miss the opportunity to use more relevant keywords to describe each individual page.</i>		<b>How to fix</b> <i>Add a unique, relevant description for each page of your website.</i>		
 Description too long		2 	1	0
<a href="https://www.plumbersthatcare.com/service-areas">https://www.plumbersthatcare.com/service-areas</a>				
<a href="https://www.plumbersthatcare.com/emergency">https://www.plumbersthatcare.com/emergency</a>				
<b>Issue description</b> <i>Search engines can use the description meta tag to generate descriptions for snippets, but they may shorten it to a length they deem acceptable. For this reason, it's important that the page description is clear and concise, and defines the page's topic.</i>		<b>How to fix</b> <i>The general recommendation is to keep your page description length up to 158 characters, although Google can sometimes display longer snippets.</i>		
 <b>Content</b>		 2	 9	
<b>Description</b> <i>Content is the core of your SEO efforts and results. This section contains the most popular checks related to the technical health of your website's content.</i>

<b>Issue description</b> <i>The &lt;h1&gt; tag is the top-level page heading, which is the most important &lt;h&gt; tag. People usually see the &lt;h1&gt; tag as the title of the text, and search engines use it to understand what the page is about. Keep in mind that from the SEO perspective, the &lt;h1&gt; tag is the second most important tag after the &lt;title&gt; tag.</i>		<b>How to fix</b> <i>Make sure all of your web pages have a unique &lt;h1&gt; header tag. Depending on the website type and page structure, there may be more than one &lt;h1&gt; tag, but it is highly recommended to use only one &lt;h1&gt; tag per page. The key thing to keep in mind here is that your pages need to be logically structured.</i>

ISSUES	PAGES	NEW	FIXED
<b>Issue description</b> <i>This issue is triggered if the Content-Encoding entity is not present in the page's response header. Compressing the page's content with the help of the server helps optimize the page loading speed. Using uncompressed pages leads to a slower page load time, resulting in a poor user experience and a lower search engine ranking.</i>			
<b>How to fix</b> <i>Enable compression on your web pages by using the Content-Encoding entity to get the page to load faster.</i>			

## JavaScript

 0 0

### Description

By using JavaScript, web developers can create dynamic and interactive websites. At the same time, JavaScript files are usually rather heavy and can significantly slow down your website if they are not optimized. Fix the errors listed in this section so that JavaScript files won't hinder your website's fast loading speed.

<b>Issue description</b> <i>HTTP response compression is not enabled on your website. Compressing JavaScript files significantly reduces their size as well as the overall size of your web page, improving the page load time as a result. Uncompressed JavaScript files make your web page load slower, which has a negative impact on the user experience and search engine rankings.</i>		<b>How to fix</b> <i>Configure server-side JavaScript compression. If you use uncompressed JavaScript files from an external resource, make sure that they do not slow down your page load time. Otherwise, contact the owner of the resource where the JavaScript files are stored with a request to configure compression.</i>	

## Links

19 ▲32 ▲3

### Description

Internal links help search engine crawlers discover new web pages and ensure link equity distribution across the website. External links help support ideas and facts expressed in content with data from external sources. Both are indispensable components for a good user experience. However, they can ruin it if they don't work properly. This section checks whether the links on your website work correctly. It also suggests improvements if it discovers any issues.

<b>Issue description</b> <i>Some pages of your website have only one internal link pointing to it. Internal links increase the importance of the page from the perspective of search engines.</i>		<b>How to fix</b> <i>Make sure that your website's most important pages have at least a couple of internal links linking out to them. All internal links must pass link juice, as in not being tagged with the rel="nofollow" attribute.</i>		
 Internal links to 3XX redirect pages		2 ▼12	2	14
<a href="https://www.plumbersthatcare.com/about">https://www.plumbersthatcare.com/about</a> <a href="https://www.plumbersthatcare.com/success-stories">https://www.plumbersthatcare.com/success-stories</a>				
<b>Issue description</b> <i>Some internal links on your website point to pages whose URL has changed. Redirects allow both visitors and search engines to access the relevant page, but we still recommend you replace such links. In some cases, such links may cause the page to work incorrectly (for example, if the site was moved to HTTPS and internal links still use the HTTP protocol). Redirects also result in the loss of a small fraction of the link juice.</i>		<b>How to fix</b> <i>Replace all internal links indicated in the report with up-to-date page URL addresses.</i>
