Q Crawling & Indexing

✖ 1 ▲1

⚠ 0

Description

Your website's pages must first be properly crawled and indexed to appear in search engine results. This section contains checks for main factors that can affect search engine crawlers' scanning and indexing of your site.

ISSUES	PAGES	NEW	FIXED
✖ Canonical URL with a 3XX Status Code https://www.plumbersthatcare.com/backflow	1 ▲1	1	0

Issue description

A web page specified as canonical, returns a 3XX response code.

How to fix

Analyze the list of canonical URL pages that point out to redirected pages. Replace canonical URLs containing redirects with 200 OK pages that you want to get indexed and be displayed in the SERPs.

⤓ Redirects

✖ 0

⚠ 2

Description

Misconfigured redirects can lead to incorrect locations. This can confuse users, ruin their experience, increase the number of HTTP requests to your website, and result in a traffic drop and crawling budget decline. The checks in this section help you maintain control over your redirects and pinpoint room for improvement related to them.

ISSUES	PAGES	NEW	FIXED
⚠ 3XX HTTP status code https://www.plumbersthatcare.com/backflow-testing https://www.plumbersthatcare.com/hydro-jetting-drainage-solutions	2 ▲1	1	0

Issue description

The pages indicated in the report return a 3XX response code, meaning that a redirect is set up from such pages. The 3XX response code in itself is not a problem, but each redirect puts an additional load on the server, so it's better to remove unnecessary internal redirects.

How to fix

Make sure that the number of 3XX pages on your website does not exceed 5% of the total number of pages. If their number exceeds 10%, then you have a critical problem, and you should immediately remove some of the redirects.

sitemap

✖ 12 ▲11

⚠ 1 ▲11

Description

A sitemap is a file that contains a list of all the URLs on a website that crawlers should be aware of. It must be free of irrelevant or invalid URLs to prevent it from hurting your crawl budget. The checks in this section help ensure your sitemap remains in place and error-free.

ISSUES	PAGES	NEW	FIXED
⚠ 3XX redirects in XML sitemap https://www.plumbersthatcare.com/hydro-jetting-drainage-solutions	1	0	0
Issue description <i>The XML sitemap contains URLs that redirect visitors from one page to another via 3XX redirects, which, in turn, can drain the crawl budget and lead to website indexing issues.</i>	How to fix <i>Replace redirecting URLs in the XML sitemap with destination URLs. If a destination URL is already in the XML sitemap, you should delete URLs with 3XX redirects from the XML sitemap.</i>		

ISSUES	PAGES	NEW	FIXED
✖ Non-canonical pages in XML sitemap https://www.plumbersthatcare.com/backflow https://www.plumbersthatcare.com/plumber-marble-falls https://www.plumbersthatcare.com/emergency-plumbing https://www.plumbersthatcare.com/plumber-burnet https://www.plumbersthatcare.com/plumber-horseshoe-bay https://www.plumbersthatcare.com/plumber-kingsland https://www.plumbersthatcare.com/plumber-granite-shoals https://www.plumbersthatcare.com/plumber-liberty-hill https://www.plumbersthatcare.com/plumber-buda https://www.plumbersthatcare.com/plumber-kyle https://www.plumbersthatcare.com/water-leak-repair https://www.plumbersthatcare.com/gas-line-services	12 ▲11	12	1
Issue description <i>Non-canonical pages have been found in the XML sitemap file. All pages listed in the sitemap should be suggested as canonicals for search engines.</i>	How to fix <i>Make sure your XML sitemap only contains canonical URLs.</i>

Issue description <i>Search engines can use the description meta tag to generate descriptions for snippets, but they may shorten it to a length they deem acceptable. For this reason, it's important that the page description is clear and concise, and defines the page's topic.</i>	How to fix <i>The general recommendation is to keep your page description length up to 158 characters, although Google can sometimes display longer snippets.</i>

Issue description <i>Having the same content on different pages of your website can negatively affect its optimization efforts because its content isn't unique. Moreover, duplicate pages can result in cannibalization issues.</i>	How to fix <i>Find and eliminate the problem that's causing duplicate content issues. To solve this issue, you can set up a 301 redirect from the duplicate page to the original one or use the rel=canonical attribute on the page that you prefer to get indexed. If you want to prevent search engines from following links on your web pages, use the noindex,nofollow tags, and if you want to allow them to do so, use the noindex,follow tags. Another option is to make the content on one of the duplicate pages unique.</i>

Issue description

The `<h1>` tag is the top-level page heading, which is the most important `<h>` tag. People usually see the `<h1>` tag as the title of the text, and search engines use it to understand what the page is about. Keep in mind that from the SEO perspective, the `<h1>` tag is the second most important tag after the `<title>` tag.

How to fix

Make sure all of your web pages have a unique `<h1>` header tag. Depending on the website type and page structure, there may be more than one `<h1>` tag, but it is highly recommended to use only one `<h1>` tag per page. The key thing to keep in mind here is that your pages need to be logically structured.

Links

✖ 156 ▼10

⚠ 2 ▼10

Description

Internal links help search engine crawlers discover new web pages and ensure link equity distribution across the website. External links help support ideas and facts expressed in content with data from external sources. Both are indispensable components for a good user experience. However, they can ruin it if they don't work properly. This section checks whether the links on your website work correctly. It also suggests improvements if it discovers any issues.

ISSUES	PAGES	NEW	FIXED
Issue description <p><i>Some pages of the website don't have any internal links pointing to them.</i></p> <p><i>Search engines can only find and index such pages if they are indicated in the XML sitemap or via external links.</i></p> <p><i>Your website visitors cannot access such pages from other pages of the site.</i></p>			
How to fix <p><i>Check your website's internal linking and ensure that visitors and search robots can easily access every important page.</i></p>			
! One inbound internal link	11 ▲11	11	0
<p>https://www.plumbersthatcare.com/water-heater-guide</p> <p>https://www.plumbersthatcare.com/service-area/austin</p> <p>https://www.plumbersthatcare.com/service-area/marble-falls</p> <p>https://www.plumbersthatcare.com/service-area/burnet</p> <p>https://www.plumbersthatcare.com/service-area/horseshoe-bay</p> <p>https://www.plumbersthatcare.com/service-area/kingsland</p> <p>https://www.plumbersthatcare.com/service-area/granite-shoals</p> <p>https://www.plumbersthatcare.com/service-area/bertram</p> <p>https://www.plumbersthatcare.com/service-area/spicewood</p> <p>https://www.plumbersthatcare.com/rss.xml</p> <p>https://www.plumbersthatcare.com/api/success-stories/rss.xml</p>			
Issue description <p><i>Some pages of your website have only one internal link pointing to it.</i></p> <p><i>Internal links increase the importance of the page from the perspective of search engines.</i></p>			
How to fix <p><i>Make sure that your website's most important pages have at least a couple of internal links linking out to them. All internal links must pass link juice, as in not being tagged with the rel="nofollow" attribute.</i></p>			
! Internal links to 3XX redirect pages	2 ▲2	2	0
<p>https://www.plumbersthatcare.com/services</p> <p>https://www.plumbersthatcare.com/permit-resolution-services</p>			
Issue description <p><i>Some internal links on your website point to pages whose URL has changed. Redirects allow both visitors and search engines to access the relevant page, but we still recommend you replace such links. In some cases, such links may cause the page to work incorrectly (for example, if the site was moved to HTTPS and internal links still use the HTTP protocol). Redirects also result in the loss of a small fraction of the link juice.</i></p>			
How to fix <p><i>Replace all internal links indicated in the report with up-to-date page URL addresses.</i></p>			
! External links to 3XX	212 ▲210	211	1
